FARRUKH JUMAYEV

Full Stack Software Engineer (TypeScript, Next.js, Node.js, PostgreSQL, AWS)

Tashkent, Uzbekistan • the.farrukh.dev@gmail.com • +998 (88) 811-41-71 github.com/thefarrukhdev • linkedin.com/in/farrukhdjumayev • thefarrukhdev.vercel.app

PROFESSIONAL SUMMARY

Product-minded Full Stack Software Engineer with deep foundations in computer systems from **School 21 (42 Network)**. Specializes in taking complex requirements from relational schema design and deterministic backend business logic (Node.js/NestJS, Python/FastAPI, PostgreSQL) to high-speed, accessible user interfaces (Next.js 15, React 19, TypeScript). Proven track record architecting live production booking engines, multi-tenant administrative portals, and automated data pipelines deployed on AWS and Docker. Fast builder with an ownership mindset, rigorous test habits, and zero tolerance for data corruption or runtime bottlenecks.

TECHNICAL SKILLS

Programming Languages:	TypeScript, JavaScript (ES6+), SQL (PostgreSQL), Python (FastAPI), C (POSIX, memory management)
Backend & APIs:	Node.js, NestJS, Express.js, FastAPI, RESTful APIs, WebSockets, JWT/OAuth Auth, Microservices
Databases & Caching:	PostgreSQL (indexing, atomic transactions, schema design), Redis (caching), Prisma ORM
Frontend Architecture:	Next.js 15 (App Router, Server Actions, SSR/ISR), React 19, Zustand, TanStack Query, Tailwind CSS, shadcn/ui
Cloud & DevOps:	AWS (EC2, S3, RDS), Docker, Docker Compose, Linux (POSIX, Bash), GitHub Actions (CI/CD)
Quality & Testing:	Vitest, Playwright, Jest, Zod (runtime validation), Core Web Vitals (sub-second LCP, zero CLS)
Spoken Languages:	English (Professional Working Proficiency), Uzbek (Native), Russian (Conversational)

PROFESSIONAL EXPERIENCE

Full Stack Engineer (Contract / Client Solutions) 2024 – Present

Independent Engineering & Client Solutions | Tashkent, Uzbekistan

- Architected and delivered 5+ production full-stack web platforms end-to-end using Next.js 15, TypeScript, Node.js/NestJS, and PostgreSQL.
- Prevented concurrency issues and race conditions by designing atomic database transactions and strict UTC timestamp validations.
- Engineered query indexing and Redis caching strategies, slashing database query latency by 35% while sustaining 99.9% uptime.
- Enforced end-to-end type safety using Zod and TypeScript, eliminating client-server schema drift across asynchronous API contracts.
- Automated CI/CD deployment pipelines via GitHub Actions and Docker containerization on Linux/AWS, ensuring zero-downtime releases.
- Optimized frontend rendering pipelines and asset delivery, consistently achieving **95+ Google Lighthouse scores** across Core Web Vitals.

FEATURED PROJECTS

Safaar Booking Platform — Next.js 15, TypeScript, NestJS, PostgreSQL, Redis, Tailwind CSS safaar.uz

- Architected real-time room reservation engine and multi-property management portal with dynamic date-range availability filters.
- Implemented atomic booking transactions in PostgreSQL with strict UTC parsing, preventing double-bookings and timezone offset errors.
- Integrated secure NestJS REST endpoints with client-side state machines, reducing checkout latency to under 120ms.

School 21 CareerHub — Next.js 15, TypeScript, PostgreSQL, Tailwind CSS, shadcn/ui, Radix UI careerhub.21-school.uz

- Engineered institutional career portal connecting 500+ School 21 (42 Network) engineers with tech employers and recruiters.
- Built authenticated candidate profiles, multi-attribute vacancy search filters, and recruiter application pipelines.
- Crafted accessible, WCAG-compliant UI primitives with shadcn/ui and Radix UI, achieving **98+ Google Lighthouse scores** and sub-second page loads.

AgyChat CLI & AI Tooling — Python, FastAPI, AsyncIO, Linux Subprocesses, CLI github.com/thefarrukhdev/agychat

- Developed an asynchronous terminal-based AI workflow tool in Python managing real-time token streams and shell command execution.
- Implemented defensive parsing and sanitization for streaming outputs and process exit-code supervision on Linux.
- Built companion FastAPI microservice endpoints for remote session synchronization and task status streaming.

Kokand University Portal — Next.js, Node.js, TypeScript, PostgreSQL, REST APIs kualumni.uz

- Developed full-stack administrative analytics portal and vacancy hub for university graduates and corporate recruiters.
- Constructed interactive data visualization dashboards for administrative staff to monitor graduate placement statistics and trends.
- Streamlined candidate application pipelines and automated report generation, cutting administrative reporting turnaround by 50%.

EDUCATION

School 21 / 42 Network 2024 – Present

Software Engineering Program (Peer-to-Peer, Project-Based) | Samarkand, Uzbekistan

- Rigorous project-driven curriculum: C, memory management, algorithms, data structures, and POSIX Unix systems.
- Specialized in backend web services, distributed systems logic, and RESTful APIs using Node.js, Express.js, NestJS, and PostgreSQL.

Najot Ta'lim 2024

Full Stack & Modern Web Development Bootcamp | Tashkent, Uzbekistan

- Completed intensive training in modern TypeScript/JavaScript, React ecosystem, Next.js, state management, and component architecture.
